

Rules for exhibiting models on the Club Stand at Shows

1. A dry run will be held at the last club night before the show. Only models that are included in the dry run are guaranteed a place on the Club Stand. If you wish to exhibit, please ensure you bring either the model itself or a place holder of the same size as the model to the dry run. If you cannot make the dry run, please either get one of your friends to bring your exhibit along, or let one of the committee members know in advance of the dry run what you wish to exhibit.
2. Exhibits should be at the show in good time to allow the club stand to be set up. Normally this is one hour before the show opens (If the show opens at 10am then members exhibits are needed at 9am). If you don't wish to arrive that early, please arrange for a friend or committee member to take your exhibits for you.
3. Models for exhibit should be completed, no "work in progress" models unless agreed in advance with the committee.
4. Models should only be exhibited at each show once (e.g., if you displayed your kit at the MK show in 2010 then it will not be eligible for the stand at MK in 2011). This helps to keep the club stand looking fresh and different.
5. Once on the club stand, models may not be removed until the close of the show. If you wish to enter your model in the competition then it should not be included on the club stand. Where ever possible the committee will advise if competitions are separate from the display stands so you can plan what models you want to enter.
6. Any members displaying models on the club stand are expected to take a turn in manning the stand during the show.
